BROADCOM®

Partner Self-Certification for Customer's Portable VCF Licenses

Self-Certification Checklist

OVERVIEW:

Broadcom Partners offering **VMware Cloud Foundation (VCF) based integrated solutions** are able to collaborate with Broadcom on a solution for customers who intend to use their VCF license portability entitlement with that integrated solution. Such an arrangement will enable all customers who procured VCF licenses eligible for License Portability (LP) to migrate to the same, consistent, VCF solution offered by the cloud service provider, and Broadcom will not charge that partner for the fees in which the partner would owe had the customer not used their own licenses. To ensure partners offering integrated VCF solutions are ready technically and operationally, a partner self-certification is required by completing the License Portability Qualification Checklist. This checklist further ensures that providers are running a supported version of VCF as defined in the [VMware Cloud Foundation Specific Program Documentation (SPD)](). Certification must be done for all partner integrated offerings that will support License Portability, and any new offerings in the future must also go through the self-certification process. For cloud service providers offering only a non-integrated solution (e.g., bare metal-as-a-service), partners do not need to complete this checklist. For additional questions regarding completion of this form, reach out to your local Broadcom contact.

LICENSE PORTABILITY QUALIFICATION CHECKLIST:

1. Are you an existing partner of Broadcom under the VCSP or MaaS programs?

    a. **[If Yes]** Please Provide the name of which Program your are participating in and proceed to Question 2 _____

    b. **[If No]** You are not required to complete the checklist at this time. For cloud service providers offering only a non-integrated solution (e.g., bare metal-as-a-service), all hardware infrastructure used for the new VCF, is recommended to meet the Broadcom hardware certification requirements and be listed on the [VMware Compatibility Guide (VCG)]().

2. If you are a partner of Broadcom under the above programs, do you currently have any integrated offerings with the full stack of components of VCF 5.1 or plan for later?

    a. **[If Yes]** Proceed to Question 3

    b. **[If No]**, What is the firm go-live date for such fully integrated offering that has been agreed to by Broadcom? _____

If you do not have a clear idea of the timeline please revisit this self-certification checklist when this becomes available.

3. Do you agree to maintain the full stack VCF as described in the VCF SPD? *Please Note: A solution that does not support full stack VCF will be disadvantaged when customers are evaluating the migration to the cloud.*

4. Do you agree to maintain the VCF solution with all the necessary upgrades and updates per the terms of your agreement with Broadcom?

5. Do you offer a fully managed or partially managed offering (where certain functions are managed by the customer)? _____

6. Do you authorize Broadcom to list your offering on our public website as eligible for license portability?

7. Along with integrated offerings, do you also intend to offer non-integrated technology certified Infrastructure only offerings to customers porting VCF? If yes, please note questions 8-12 are not applicable for these offerings.

8. Do you understand and would you be willing to participate in customer's proof of purchase verifications per Broadcom policies (for more details request the Partner License Portability Process Guide from your local Broadcom Sales)?

9. Do you understand that if you allow the customer to use licenses above the allowed contracted limit for ported entitlements, you may be responsible for any software overage which is expected to be passed on to the customer?

10. Do you understand that in the case where fraudulent activity is detected, Broadcom may require you to terminate that customer's service?

11. Are you willing to limit the ported licenses to run on infrastructure hardware dedicated only for a customer, and agree to not use portability with multi-tenant infrastructure?

12. Please provide the list of your offerings being certified hereunder:

Partner	Offering Name	Offering Description	Full Stack or Partial Offering	Offering Availability Date

Receiving Party:

_____
Signature   Date

_____
Printed Name
